EDUCATION

York University - Lassonde School of Engineering

Bachelor of Engineering, Software Engineering

Toronto, Canada

Sept 2020 – June 2026 (Expected)

EXPERIENCE

Technical Project Manager

Sept 2025 – Present

YU Blueprint

Toronto, ON

- Defined system architecture and technical scope for a scam-awareness training platform for seniors in partnership with Gal Senior Care Foundation
- Led engineering execution for the platform roadmap, translating requirements into tasks and milestones

Software Engineering Intern

Sept 2023 – Aug 2024

Ericsson

Ottawa, ON

- Built a **Python** automation system to manage cell and sector activity on **5G** network nodes, powering down radios during off-peak hours and **cutting energy use 30%**
- Delivered an internal **React/Grafana/Python** analytics platform that automated CLI workflows on radio-tower nodes and sped network troubleshooting
- Migrated test automation to a new framework and authored **25+ JUnit tests**, reducing execution time by **25%** and improving release throughput

Software Engineering Intern

Apr 2023 – Aug 2023

Chatbase

Toronto, ON

- Built a **React** support portal with Zendesk API integration, reducing ticket resolution time by **50%**
- Implemented CSV/JSON export workflows for chatbot conversation logs and analytics, improving **QA, debugging, and customer reporting**
- Shipped production integrations for **Shopify, Facebook, and Wix**, expanding chatbot deployment across commerce and social channels
- Standardized API docs and authentication flows, improving onboarding and integration consistency

Teaching Assistant

Sept 2021 – Dec 2021

York University - Lassonde School of Engineering

Toronto, ON

- Held weekly office hours and tutorials for ENG 1101, supporting first-year students on coursework and assignments

PROJECTS

Course Reviews Web Application | Next.js, React, Node.js, Express, Python, PostgreSQL, Docker

- Deployed a **full-stack course reviews platform** for anonymous class reviews, reaching **200+ users and 100+ reviews** at peak usage
- Developed a **multithreaded Python scraper** to ingest **10,000+ course records** across Ontario universities for fast structured search

Quad-Tree Image Compression CLI Tool | Rust

- Built a **Rust** CLI for quad-tree image compression with **O(1)** variance queries, scaling to **6k x 9k images** across **100k iterations in 7.6s**

AI Meeting Notepad Desktop Application | Electron, React, TypeScript, Go, PostgreSQL, Redis, Pinecone

- Deployed an **Electron** desktop meeting workspace for live transcription, collaborative notes, and AI workflows
- Implemented a **Go** backend with Google OAuth, WebSocket transcription, and Pinecone-backed **semantic search** over notes and transcripts

CNC Machine Embedded Control System | C/C++, C#, grblHAL

- Built the embedded control system for a portable CNC machine across **Pico 2 W** and **Teensy 4.1** controllers, integrating closed-loop motion control to machine aluminum within ± 0.05 **mm** tolerance

SKILLS

Languages: Java, Python, JavaScript, TypeScript, HTML/CSS, SQL, Go, Rust, C/C++, C#

Technologies: React, Next.js, Express.js, Node.js, REST APIs, Grafana, JUnit

Tools: Docker, Linux, PostgreSQL, Git, Redis, AWS, Jira, Jenkins, Maven, Gradle
